Team Meeting 11.17.23

WHEN: Sunday, November 12th @ 7:00 pm
PURPOSE: General meeting, work on Software Architecture document
ATTENDANCE: Ted Athon, Jaiden Green, Marcos Lepage, Dylan O'Brien, Amrit Sian, Andrew Ward

- We discussed the previous Software Requirements Specifications document regarding how we felt about splitting up the workload and what we could improve on moving forward.
- Created a design for the arithmetic expression evaluator via a UML Package Diagram and UML Class Diagram.
- Decided to use an abstract syntax tree (AST) to represent the expression's structure and handle parsing the expression recursively.
- Discussed the next steps heading into the project implementation. Ensured every member had a working development environment synced with the git repository for the project.
